CHAIRMAN'S STATEMENT

Operating Environment:

The operating environment was characterized by exchange rate volatility, during the first quarter of the year, culminating to the introduction of the Zimbabwean Gold Currency (ZWG) on the 5th of April 2024. The new currency largely tamed the inflationary pressures in the country, save for the effects of the 44% devaluation of the ZWG currency against the United States Dollar (USD) during September 2024. As a result, the later part of the period under review has seen relative stability in local currency value and inflation rates. Nevertheless, liquidity in both local and foreign currency markets has remained limited. In addition, the effects of the El Nino weather patterns impacted agricultural output, which together with erratic energy supply made a challenging operating environment. All this combined, created a tough operating environment for the Group characterised by constrained revenue generation and limited growth opportunities.

Despite the challenging environment, the Group's operations remained profitable, posting a profit after tax (PAT) of ZWG1,167 billion from the ZWG 1,124 billion restated profit, in 2023. The Group's profit performance is discussed in greater detail in the Group Chief Executive Officer's report.

The Group remains committed to maintaining robust capital adequacy. As at 31 December 2024, all Group companies, with the exception of ZB Building Society, were in compliance with the prescribed minimum capital requirements. During the year, the Group made a resolution to surrender the Building Society's banking operating licence to Reserve Bank of Zimbabwe (RBZ) in a bid to address the capital shortfall at the Building Society. The Reserve Bank of Zimbabwe (RBZ) has responded with conditions that need to be satisfied before the surrendering of the ZB Building Society's banking licence. These include, but are not limited to certain information requests, ensuring that the deposits are handled in compliance with the Consumer Protection Framework No.1-2017/BSD. The Group is in the process of working towards fulfilling these conditions as part of the efforts to consolidate the Group's banking operations.

The board has declared a final dividend of USD 0.57cents per share for the year ended 31 December 2024. A separate dividend notice will be published to this effect.

Sustainability and Environmental, Social, and Governance (ESG) Reporting

ZB Financial Holdings recognizes the importance of sustainable business practices. The Group's strategic drive on sustainability is underpinned by integrating environmental, social and governance into economic decisions, operations, strategy, products and services, and practices. The Group will leverage off certification through the Reserve Bank of Zimbabwe (RBZ)-led Sustainability Standards Certification Initiative (SSCI). The group has consequently made progress in its adoption of ESG reporting, and is working to integrate ESG principles into

Directorate:

Mr Luxon Zembe resigned from the ZB Financial Holdings Board on the 12th of April 2024 after having stepped down as the Board Chairman on 20 March 2024. On behalf of the Board and management, I extend my gratitude for his contributions and appreciation to him for his distinguished service to the Group as both Director and Chairman. I wish him success in his future endeavours.

I, Agnes Makamure was appointed as Acting ZBFH Chairman with effect from the 20th of March 2024 and subsequently as the substantive ZBFH Chairman with effect from 27 June 2024. I would like to acknowledge the trust and confidence that has been placed in me, and I am committed to contribute to the organization's

Mr Shepherd T Chimutanda was appointed to ZB Financial Holdings Board as an Independent Non-Executive Director with effect from 8 November 2024. I look forward to his invaluable contribution towards the Group's continued success.

Outlook:

Looking ahead, the tight monetary policy is expected to remain in place to stabilize exchange rates and control inflation. On the back of an improved 2024/2025 rainy season, the economy is expected to benefit from a better agricultural performance buoyed by improved rainfall.

Notwithstanding, the efforts of authorities to maintain macroeconomic stability through prudent monetary policy, the Group respectfully suggest that a balanced approach be considered, one that harmonizes stability with measures to stimulate economic growth.

The Group encourages policymakers to explore initiatives that foster a conducive business environment, promote investment and support the overall development of the economy.

The Group is confident that the implementation of its sustainable revenue generation and cost optimisation strategies will sustain the Group's performance. These include, ongoing improvement with respect to the efficiency of front-end systems, brand equity promotion and continuation with the Group's mantra of creating happy people.

Conclusion:

I would like to express my sincere gratitude to the Board of Directors, management, staff, and our valued customers for their continued support, without whom the Group would not have been able to achieve the reported profitability in 2024 and sustain its operations into the future. Notwistanding the difficult environment, I believe the collective efforts of all stakeholders will enable the Group to continue delivering sustainable and positive results in the future.

A. Makamure (Chairman)

28 March 2025

GROUP CHIEF EXECUTIVE OFFICER'S REPORT

The Group's primary financial statements are presented in Zimbabwe Gold Currency (ZWG) in accordance with IAS 21 "Effects of Changes in Foreign Exchange Rates.

The Group's total income increased by 38% from ZWG2,308 billion in 2023, to ZWG3,211 billion in 2024. This performance outturn was on the back of significant improvement in non-funded income mainly from commissions fees and other income, whilst funded income registered a steady improvement.

Despite constrained growth in loans and advances, the Group's net interest income increased by 14% from ZWG0,417 billion in 2023 to ZWG0,475 billion in 2024. Loan impairment charges declined by 17%, from ZWG0,126 billion in 2023 to ZWG0,104 billion in 2024. Resultantly, income from lending activities net of recoveries rose by 27% from ZWG0,292 billion in 2023 to ZWG 0,370 billion in 2024, aided by improved interest margins and bad debts recovered was ZWG0.069 billion in 2024.

Banking commissions and fees went up by 76%, to close 31 December 2024 at ZWG1,158 billion. The improvement was mainly due to increase in electronic banking transactions as the Group continues with its digitization journey.

The Group generated assurance gross premium of ZWG 0,16 billion for the year ended 31 December 2024 from ZWG 0.099 billion in 2023. The Group also achieved a reinsurance gross premium of ZWG 0,33 billion in 2024 from ZWG 0,37 billion in 2023. The growth in gross premium was mainly driven by an increase in new business as well as the increase in sum assured and increase in the share participation.

Insurance service result was a deficit of ZWG0,007 billion in 2024 against a loss of ZWG0,340 billion in 2023, largely as a result of a decrease of 61% in insurance service expenses from ZWG0,839 billion in 2023 to ZWG 0.328 billion in 2024

The Group's operating costs increased by 8% from ZWG1,626 billion in 2023 to ZWG 1,785 billion in 2024. The Group is expecting cost savings from automation of its processes.

Profit from ordinary activities improved to close at ZWG1,426 billion represented a growth of 109% against ZWG0,682 billion recorded in prior year.

The Group's profit after tax increased by 4% to ZWG1,167 billion in 2024 from ZWG1,124 billion in 2023.

Meanwhile, the Group's total assets increased by 104%, from ZWG7,062 billion as at 31 December 2023 to ZWG14,383 billion as at 31 December 2024. The growth rate outperformed average inflation over the same period (blended 3.7%).

Deposits and other related funding account balances closed the year at ZWG5.483 billion as at 31 December 2024, representing a growth of 120% from ZWG2.488 billion as at 31 December 2023. The growth was supported by an increase in USD deposits across all sectors.

Earning assets increased by 103% from ZWG4,814 billion as at 31 December 2023 to ZWG 9,346 billion as at 31 December 2024 whilst constituting 65% of total assets (68% at 31 December 2023).

The Group maintained a comfortable liquidity margin of safety, with the ratio of liquid assets to customer deposits being above 40% throughout the year against a prescribed ratio of 30%.

The Group's total equity increased by 125%, from ZWG2,948 billion as at 31 December 2023 to ZWG6,641 billion as at 31 December 2024, underpinned by the positive performance outturn for the year, reflected by a 106% and 223% rise in retained earnings and other components of equity respectively.

Operations Review:

Banking Operations:

ZB Bank Limited posted a profit after tax of ZWG1,110 billion in 2024 up from ZWG 0,545 billion in 2023. Its total assets stood at ZWG10.36 billion as at 31 December 2024, from ZWG4.63 billion as at 31 December 2023.

ZB Building Society posted a loss of ZWG0.069 billion in 2024 from a profit of ZWG0,078billion as at 31 December 2023. The loss position was mainly driven by subdued revenue growth and increased foreign currency revaluation losses. The Society's total assets stood at ZWG0,565 billion as at 31 December 2024, from ZWG0.291 billion as at 31 December 2023.

Insurance Operations:

ZB Reinsurance posted a profit after tax of ZWG0,037 billion in 2024 down from a profit of ZWG0,053 billion in 2023. Its total assets increased from ZWG0,274 billion as at 31 December 2023 to close the year 2024 at ZWG0.487 billion.

ZB Life Assurance posted a profit of ZWG0,167 billion in 2024 up from ZWG0,034 billion in 2023. Its total assets increased from ZWG0,523 billion as at 31 December 2023 to ZWG1,005 billion as at 31 December 2024.

In 2024, the Group slightly increased its shareholding in Mashonaland Holdings (Mash), from 56.89% as at 31 December 2023 to 57.69% as at 31 December 2024. Mash posted a profit after tax of ZWG0,064 billion in 2024, up from deficit of ZWG0,155 billion in 2023. Its total assets increased from ZWG1.247 billion as at 31 December 2023 to close the year 2024 at ZWG2,449 billion. Mash commissioned the Pomana Commercial Centre and 12 Van Praagh Day Hospital projects during the current year.

The Group restructured its investment cluster by closing down ZB Capital operations as at 1 January 2025 and also resuscitated asset management operations with effect from 1 January 2025.

Internal Processes:

One of the major projects in FY2024 was the launch of a new core banking system, a project which was on the cards for the past few years - naturally, a project of such magnitude requires a significant outlay of resources, inclusive of financial, human capital, and time. With the new core banking system, the Group has improved its capacity to enhance the customer journey and exceed customer expectations, as well as further progress the digital transformation initiative, #OneDigitalZB. In a related initiative, the Group initiated a Digital Wallet project, expected to be finalised and launched in 2025.

With FY2024 being the penultimate year in the Group's medium-term plan for 2021-2025, the Group has begun to lay the foundation for the next medium-term plan long term sustainability as one of the core tenets underpinning its strategy, and towards this end is one of the financial institutions seeking certification under the Central Bank-led Sustainability Standards Certification Initiative (SSCI) through the European Organisation for Sustainable Development (EOSD). ZB Bank is one of the Zimbabwean financial institutions at the forefront in the certification journey - as at end of 2024 the Bank had completed internal processes and awaiting review and feedback by EOSD. As a Group, ZBFH will continue to avail resources towards supporting Government priorities, including the National Development Strategy 1 (NDS1), as well as Sustainable Development Goals (SDGs) being prioritised by Government in the country's Vision 2030 towards attaining upper middle-income

Innovation continued to play a huge role in the Group's Strategy in FY2024. Having launched its Innovation Hub in early 2024, and partnered with the country's major state Universities in innovation, ZBFH was proud to work with a young innovator who was awarded first runner up prize in the Presidential Innovation Awards, under the Private Sector category.

People & Culture:

The Group has continued to leverage off the benefits of adopting the new business model and organisational design, in the recent past. The staff re-organisation and re deployment of staff in the prior year, has enhanced the Group's operational efficiencies. In the prior year, as the new Group structure settled, 59 Staff members signed up for the Voluntary Disengagement Scheme (VDS), whilst 36 staff members approaching retirement were disengaged under the Compulsory Disengagement Scheme (CDS). There were no further significant staff disengagements during the current year. The Group staff complement as at 31 December 2024 stood at 999

Industrial relations remained cordial during the year under review.

My profound gratitude goes to our valued customers and stakeholders for the support and commitment that they continue to render to the ZBFH Group.

I would also like to extend my appreciation to the Group's Staff and Management team for their various contributions, inputs and efforts which enabled the Group to attain this performance for the full year to

Finally, I remain indebted to the Board for its valuable contribution and counsel.

S. T. Fungura (Group Chief Executive Officer)

AUDITOR'S STATEMENT

These financial results should be read in conjunction with the full set of consolidated and separate financial statements of the Group for the year ended 31 December 2024, which have been audited by Ernst & Young Chartered Accountants (Zimbabwe). A qualified audit opinion ("except for") has been issued due to the Group's non-compliance with the requirements of International Financial Reporting Standards, specifically International Accounting Standard 21 ("IAS 21"), 'The Effects of Foreign Exchange Rates,' in relation to the translation of some opening balances from Zimbabwean Dollars (ZWL) to United States Dollars (USD) on the date of change in functional currency. The audit report on the consolidated financial statements includes key audit matters on the valuation of expected credit losses on financial assets and the valuation of insurance contract liabilities.

The auditor's report on these financial statements is available for inspection at the Company's registered office. The Engagement Partner on the audit resulting in the independent auditor's report is Mrs. Elina Bvurere, PAAB Practice Certificate Number 0462.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS For the year ended 31 December 2024

1. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The principal accounting policies adopted in the consolidated and separate financial statements, which are set out below. have been consistently followed in all material respects (except for matters disclosed under note 1.1.1.1) and are in accordance with IFRS Accounting Standards.

Where reference is made to "the Group" or "Company" in the accounting policies, it should be interpreted as referring to the "consolidated" or "separate" respectively, where the context requires, unless otherwise noted.

1.1 Basis of preparation

1.1.1 Functional and presentation currency

1.1.1.1 Change in functional currency

Following the enactment of Statutory Instrument ("SI") 185 of 2020 on 24 July 2020, the Group witnessed a gradual increase in the use of foreign currency across its operations. Subsequently, in June 2022, the government established the multicurrency system into law until 31 December 2025 through Statutory Instrument 118A of 2022. Moreover, on 27 October 2023, Statutory Instrument 218 of 2023 (SI 218/23) extended the settlement of transactions in foreign currency until 31 December 2030, assuring businesses regarding the continuity of the multi-currency system. This has since been confirmed through the Finance Act No.13 of 2023. This announcement facilitated access to foreign currency and long-term loans critical for working capital and business expansion.

As a result of these developments, the company re-evaluated its functional currency in accordance with IAS 21 ("The Effects of Changes in Foreign Exchange Rates").

In assessing functional currency for the businesses, the following factors were considered:

- the currency that mainly influences sales prices for goods and services (the currency in which sales prices for goods and services are denominated and settled)
- (ii) the currency which influences labour, material and other costs of providing goods and services.
- (iii) the currency in which funds from financing activities are generated
- (iv) the currency in which receipts from operating activities are usually retained

1.1.1.2 Change in presentation currency

The Group and the Company elected to present these audited financial statements in the Zimbabwe Gold (ZWG). The parent elected to use ZWG as a presentation currency to comply with the Reserve Bank of Zimbabwe directive to report in ZWG.

The Group and Company presentation currency (ZWG) is a currency of a hyperinflationary economy.

In prior years, the Group and the Company's presentation currency was the Zimbabwe Dollar (ZWL), which was also the Group and Company's functional currency. The ZWL was a currency of a hyperinflationary environment, as a result, in prior year, financial statements were prepared based on the requirements of International Accounting Standard (IAS) 29 - Financial Reporting in Hyperinflationary Economies. IAS 29 requires financial statements prepared in the currency of a hyperinflationary economy to be stated in terms of the measuring unit current at the statement of financial position, and that corresponding figures for previous years be restated in the same terms. The ZWL currency was discontinued on 5 April 2024.

Statement of financial position line items for the 2024 reporting period were translated using the closing rate at 31 December 2024 while the income statement lines were translated using average rates for 2024.

All resulting exchange differences were recognised in other comprehensive income and taken to a separate component of equity, that is the Foreign Currency Translation Reserve.

Equity components of Share Capital and Share Premium have been translated using historical exchange rates. For this purpose, historical rates are defined as the exchange rates prevailing as at 1 January 2024 (Being the earliest available ZWG exchange rate of 5 April 2024). This date corresponds to the point at which management ceased the application of International Accounting Standard (IAS) 29, Financial Reporting in Hyperinflationary Economies

The financial statements for the year to 31 December 2023 were inflation adjusted and translated to USD using the 31 December 2023 closing rate of USD1:ZWL6104.7226. The December 2022 inflation adjusted numbers were translated to USD at the prevailing closing rate of USD1:ZWL684.3339. The restatement and translation effect of the above has been recognised in other

1.1.1.3 Conversion of Comparative numbers to the presentation currency

Following the adoption of the ZWG as the Group and Company's presentation currency, the Group and Company converted their comparative financial statements as follows

Conversion Methodology

Given that ZWG did not exist as a currency in the prior reporting period (2023), a two-step conversion process was employed for all amounts in the financial statements except for Property & Equipment (PE), Investment Property (IP), Right of Use (ROU) and related income and expenses. First, the hyperinflation-adjusted ZWL balances as of 31 December 2023 were converted to US Dollars (USD) using the exchange rate of USD1:ZWL6,104, as per guidance from the Institute of Chartered Accountants Zimbabwe (ICAZ) Second, these USD balances were then converted to ZWG using the exchange rate of USD1:ZWG13.56, which was the earliest available exchange rate, dated 5 April 2024.

The decision to use this two-step process, rather than a direct ZWL to ZWG conversion, was necessitated by the non-existence of ZWG for reporting period before 5 April 2024. The resulting translation and restatement gains and losses are treated by management as translation gains and losses recognised in OCI.

Specific Treatment of Certain Asset Categories

Exceptions to the general conversion methodology were made for Investment Property, Equipment, and Right-of-Use Assets, where management determined that a more accurate representation of these assets would result from alternative methods.

Investment property - The Group and Company adopted figures from the 2023 US Dollar valuation report which was done by the

Equipment - The Group and Company adopted figures from the 2023 US Dollar valuation report which was done by the appointed

Equity - Values for share capital and share premium were obtained by converting the historical amounts at the date at which equity was issued. Retained earning were adjusted for the changes made on share capital, share premium and investment property. Revaluation reserves were adjusted for changes to equipment.

Right of use asset - The Group and Company mantains its right of use assets in US Dollars. Instead of converting the 2023 IAS 29 value, the USD computation was used so as to align utilisation of the right of use asset to the related lease liability

1.1.1.4 Foreign Currency Transactions and Balances

In preparing the financial statements of the Group and Company, transactions in currencies other than the United States Dollar are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not re-translated. Exchange differences on monetary items are recognised in profit or loss in the period in which they arise.

1.1.2 Statement of compliance

The consolidated and separate financial statements as at, and for the year ended 31 December 2024, have been prepared under the supervision of E Mungoni CA (Z), Chief Finance Officer of ZB Financial Holdings Limited. The consolidated and separate financial statements are prepared based on accounting records maintained under the historical cost convention and modified by the revaluation of property and equipment, investment properties and financial instruments carried at fair value.

The consolidated and separate financial statements have been prepared in accordance with the IFRS Accounting Standards promulgated by the International Accounting Standards Board (IASB) which includes standards and Interpretations approved by IASB, the International Financial Reporting Interpretations Committee (IFRIC) interpretations except for International Accounting Standard 21 (IAS 21) and International Accounting Standard 29 (IAS 29) which were not fully complied with on conversion of opening balances. The consolidated and separate financial statements were prepared in the manner required by the Companies and Other Business Entities Act (Chapter 24:31), the Banking Act (Chapter 24:20), the Building Societies Act (Chapter 24:02), the Insurance Act (Chapter 24:07), Securities and Exchange Act (Chapter 24:25), Microfinance Act (Chapter 24:29) and relevant

The consolidated and separate financial statements were authorised for issue by the Board of Directors on 28 March 2025.

1.2 Basis of reporting

The same accounting policies and methods of computation were applied to the financial results as at the reporting date of all group entities.

1.3 Basis of consolidation

Subsidiaries

A subsidiary is an entity controlled by another entity, that is the parent. The Group controls an entity when it is exposed to, or has rights to variable returns from its involvement with the investee and has the ability to exert control over the entity's financial and operational decisions through its power over the investee. The results of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

The Group accounts for business combinations using the acquisition method when control is transferred to the entity parent. The consideration transferred in the acquisition is measured at fair value, as are the identifiable net assets acquired. Any excess of the consideration over the fair values of the identifiable net assets acquired is recognised as goodwill. Where the fair values of the identifiable net assets acquired exceed the consideration, a bargain purchase (negative goodwill) is recognised in profit or loss in the period of acquisition. Transaction costs are expensed, except if related to the issue of debt or equity

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in profit or loss.

Non-controlling interests (NCI)

Non-controlling interests are measured at their proportionate share of the fair values of the assets and liabilities recognised.

Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

Where necessary, adjustments are made to the financial statements of subsidiaries and associates to bring the accounting policies used into line with those used by the Group.

Transactions eliminated on consolidation

Intra-Group transactions, balances, and unrealised income and expenses are eliminated on consolidation.

1.4 Key sources of judgement and estimation uncertainty

Significant assumptions and estimations, as at the date of financial reporting, with material implications on the reported financial outturn and balances have been made in the following areas:

- The computation of insurance and reinsurance assets and liabilities (IFRS 17) Determination of the fair value of financial assets (IFRS 13)
- Valuation of property (including investment properties) and equipment (IAS 16 and IAS 40) Estimation of liabilities under insurance contracts including life funds valuation (IFRS 4)
- Ascertaining of the degree of control or significant influence in investee companies (IAS 27 and IAS 28)
- Determination of carrying amounts of right of use assets and lease liabilities (IFRS 16)
- Determination of exchange rates before 5 April 2024.

The nature of assumptions made and processes involved in the development of estimates, and relevant models used, where applicable, are discussed in the accounting policy notes in the Group's annual report as at 31 December 2024.

The same above significant assumptions and estimates were applied to the extent where relevant, to the financial results as at the reporting date of ZB Life, ZB Reinsurance, ZB Bank Limited and ZB Building Society, incorporated in this reporting package.

3. TREASURY BILLS

| | 31 Dec 2024 ZWG | 31 Dec 2023 ZWG |
|--|--------------------|--------------------|
| Treasury bills include: | | |
| 3.1 Assets classified as measured 'at fair value through profit or loss' (FVTPL): | | |
| Short term treasury bills ¹ | 69 750 303 | 15 304 723 |
| Assets classified as measured 'at fair value through other comprehensive income' (FVTOCI): | | |
| Medium term treasury bills acquired from the market ² | 1 017 672 269 | 314 764 909 |
| Assets classified as measured at 'amortised cost' (AMCO): | | |
| Treasury bills issued as substitution for debt instruments ³ | - | 46 046 |
| Capitalisation treasury bills ⁴ | - | 41 509 |
| Impairment charge to statement of profit or loss | (208 622 743) | - |
| | 878 799 829 | 330 157 187 |
| | | |
| Maturity within 1 year | 667 832 278 | 325 370 753 |
| Maturity after 1 year | 210 967 551 | 4 786 434 |
| | 878 799 829 | 330 157 187 |

- 1. The Group invested in treasury bills issued by the RBZ over an average period of 161 days (December 2023: 61 days) which were at an average rate of 27.83% (December 2023: 27.83%)
- 2. The Group purchased treasury bills from the secondary market. These treasury bills have an average coupon rate of 0.1755% (December 2023: 0.1755%) with an average maturity period of 1 year (December 2023: 2 years).
- The Group received treasury bills as substitution for debt instruments from the Zimbabwe Asset Management Company (ZAMCO). The treasury bills had a coupon rate of 5% (December 2023: 5%) and an average maturity period of 5 years (December 2023: 6
- 4. Capitalisation Treasury Bills (CTBs) with a face value of ZWG8,004 were acquired on 26 May 2015 from the Government of Zimbabwe by the holding company, ZB Financial Holdings Limited (ZBFH). The CTBs were then used to recapitalise ZB Bank Limited, a 100% owned subsidiary of ZBFH. During the year ended 31 December 2024, the government through RBZ fully settled the capitalised treasury bills in 2024.

Treasury bills amounting to ZWG1.34 billion (2023: ZWG401 million) were used as security for the Bank to access fixed deposits.

3.4 Determination of fair value of treasury bills

The fair value of treasury bills was determined using level 2 and level 3 (note 6.3) inputs for treasury bills which are classified as FVTPL and FVTOCI respectively. The use of level 2 and level 3 inputs is due to lack of active market for treasury bills which are designated as at "FVTPL" and FVTOCI. The Group used the discounted cash flow valuation technique by applying an average yield market rate on the contractual cash flows in order to determine the fair value of the treasury bills.

Treasury bills purchased from the secondary market were fair valued using TBs average yield market rate of 68%.

USD denominated Treasury bills fair value was computed using a proxy discount rate of 9% by reference to US Federal Reserve TBs with same tenor and adjusted for country risk.

3.4 Determination of fair value of treasury bills (continued)

Impairment assessment of treasury bills

Treasury Bills classified as FVOCI were assessed for ECL in the current year in line with IFRS 9- Financial Instruments. Ordinarily, the Group considers Treasury Bills to be of low risk instruments due to the nature of them having local sovereign exposure. However, some of the Treasury Bills matured towards the end of 2024 and they were not yet settled. The Group considered that the whole portfolio of Treasury Bills to have had a significant increase in credit risk and thus the related Expected Credit Losses were recognized in the financial statements for the year ended 31 December 2024.

| Mortgage advances | 266 922 932 | 123 913 030 |
| Other advances: Loans, overdraft and other accounts Asset finance loans Bills discounted | 3 427 166 636 449 209 303 8 285 252 | 1 827 729 954 265 384 488 - |
| Total other advances | 3 884 661 191 | 2 093 114 442 |
| Gross advances | 4 151 584 123 | 2 217 027 472 |
| Off balance sheet exposures In respect of guarantees In respect of Letter of credit In respect of loan commitment | 350 586 224 - 1 969 438 594 | 94 302 910 - 1 062 348 934 |
| Gross credit exposure | 6 471 608 941 | 3 373 679 316 |
| Gross advances Less: Allowance for loan impairments Net advances | 4 151 584 123 (162 905 078) 3 988 679 045 | 2 217 027 472 (112 971 991) 2 104 055 481 |
| 4.2 Maturity analysis On demand | 445 221 664 | 137 125 196 |
| Within 1 month Between 1 and 6 months Between 6 and 12 months After 12 months | 178 951 333 590 793 163 3 471 704 429 1 784 938 352 | 190 815 051 599 374 265 634 903 297 1 811 461 507 |
| 4.3 Non-performing loans Included in the above are the following; | 6 471 608 941 | 3 373 679 316 |
| Non-performing loans Less: Allowance for loan impairments | 135 483 881 (15 838 208) 119 645 673 | 34 234 105 (7 686 674) 26 547 431 |

For the secured non-performing loans, security exists in the form of liens registered over funded accounts, bonds registered over landed property and guarantees in various forms. The Bank discounts the value of the security at hand using internal thresholds for prudential purposes. Generally no security value is placed on ordinary guarantees. The internally discounted value of security held in respect of the non-performing book amounted to ZWG119.7 million as at 31 December 2024 (2023: ZWG26.5 million).

19 EARNINGS PER SHARE

Basic earnings per share (ZW cents)
The calculation of basic earnings per share for the period ended 31 December 2024 of ZWG730 cents (2023: ZWG643) is based on the profit after tax attributable to the parent of ZWG1,149 billion (2023: ZWG 1,012 billion) and weighted average number of shares of 157 522 902 (2023:157 522 902).

There were no dilutive instruments for the year.

20 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

20.1 Capital risk management

Management of the Group monitors the level of capital adequacy on a continual basis, employing techniques adopted from the guidelines developed by the Basel Committee and contained in the Basel II capital accord as implemented by the supervisory authorities for each of the affected entities. For the life assurance business, regular actuarial reviews are undertaken to establish the solvency of the business.

An Internal Capital Adequacy Assessment Plan (ICAAP) has been developed for Banking operations and defines capital targets which are generally set above regulatory levels, stress test scenarios and risk appetite across different lines of operations.

Management of the Group monitors the level of capital adequacy on a continual basis, employing techniques adopted from

20.2 Financial risk management

The Group maintains active trading positions in a variety of non-derivative financial instruments in anticipation of customer demand. The Group manages its trading activities by the type of risk involved and on the basis of the categories of trading instruments held. Regular feedback on risk related matters is provided to the Board through the Board Governance, Risk and Compliance Committee.

20.2.1 Classification and measurement of financial assets and financial liabilities

The following table shows the carrying amounts and the fair values of financial assets and financial liabilities, including their

The carrying amount of financial assets and financial liabilities approximate their fair value.

20.2.2 Valuation techniques for securities held at fair value

20.2.2.1 Level 1 valuation

Listed equity investments are valued in relation to prices ruling at the stock market at which the stock is listed at the close of business on 31 December 2024.

2.2.2.2 Level 2 valuation

These investments are valued using inputs other than quoted prices which are observable for the asset. Treasury bills are valued by discounting cash flows using the market rate for similar instruments as the discounting rate.

Unlisted investments were valued at net asset value, dividend growth model and price earnings multiple techniques. In applying this method judgement was used.

| Туре | Valuation technique | Significant unobservable inputs |
|--------------------------------|--|---|
| Equity Security | Net Asset Value (Level 3): The valuation model determines the fair value of investment securities with reference to the net asset value, which was determined by the directors as a proxy valuation method. NAV valuation method was used where investees are largely property holdings, insurance and investment entities. | The fair values of investment securities are based on net asset values which make use of the net movements in the assets and liabilities or investee entities. |
| | Discounted Cash Flow Method (Level 3): The method uses the past financial information to predict the future cashflows which are then discounted using the weighted cost of capital. Despite several practical challenges in applying the discounted free cash flow ("DCF") method, such as but not restricted to; challenges in anticipating the right inouts for the model, dependence on several assumptions and the subjectivity of some of them. | Risk Discounting rate. December 2024: Average rates of 20%-38% (December 2023: Average rates of 20%-40%) A 5% increase in the risk discounting rate will result in a decrease in profit or loss of ZWG90.8million (2023: ZWG22.9 million), while a 5% decrease in the risk discounting rate will result in an increase in profit or loss of ZWG90.8 million (2023: ZWG22.9 million). Sustainable growth rate as at 31 December 2024 was 9.7%: (December 2023: 9.7%). A 2% increase in the sustainable growth rate will result in an increase in profit or loss of ZWG36.3 million (2023: ZWG9.2 million), while a 2% decrease in the sustainable growth rate will result in a decrease in profit or loss of ZWG36.3 million (2023: ZWG9.2 million). Terminal value based on market exit EBITDA multiple December 2024 2.93X (December 2023: 2.93X) A 10% increase in terminal value will result in a decrease in profit or loss of ZWG181.7 million (2023: ZWG45.8 million), while a 10% decrease in terminal value will result in an increase in profit or loss of ZWG181.7 million (2023: ZWG45.8 million). |
| | Price earnings multiple (Level 3): The price earnings multiple was considered suitable for valuation of Zimswitch as it is among the most generally used valuation methods when valuing a company's business. The application of the P/E method is affected mostly by the use of historical earnings ("trailings earnings") Although employing forward earnings is an option, the calculation of such earnings is arbitrary. This is especially problematic for Zimswitch's valuation because the macroeconomic environment in which the valuation is being done is volatile and characterized by hyperinflationary conditions, which means that the company's past earnings may not be indicative of its future earnings. The market approach as prescibed by IFRS 13 - Fair valuation requires the identification of a similar or identical quoted assets with similar risk profiles | Adjusted market price earnings multiple. Price earnings ratio December 2024: 5.7X-8.9X; (December 2023 5.9X-8.8X) A 20% increase in price earnings ratio will result in an increase in profit or loss of ZWG363.3 million (2023: ZWG91.6 million), while a 20% decrease in price earnings ratio will result in a decrease in profit or loss of ZWG363.3 million (2023: ZWG91.6 million). |
| | EBITDA (Level 3): It measures the total value of a company, including its debt and equity, relative to its financial performance. In order to avoid complicated accounting changes, it requires easily accessible financial data in the form of proxy multiples and a company's EBITDA figures. | EBITDA multiple. December 2024: 4.84X-7.58X (December 2023 4.84X-17.72X) A 50% increase in EBITDA will result in increase in profit or loss o ZWG937.6 million (2023: ZWG222.7 million), while a 20% decrease in EBITDA will result in a decrease in profit or loss of ZWG937.6 million (2023: ZWG222.7 million). |
| Equity Security (continued) | Enterprise value Value/Sales valuation method (EV/Sales Valuation Method) (Level 3): This method calculates the enterprise value (EV) by dividing the ompany's market capitalization by its annual sales revenue. It provides a good valuationbased on its revenue performance | Value/Sales Adjusted EV/Sales Multiple December 2024:3.1X -8.7X (December 2023: 3.13X - 15.96X) A 5% increase in adjusted EV/Sales Multiple will result in an increase in profit or loss of ZWG90.8million (2023: ZW22.9 million). While a 5% decrease in adjusted EV/Sales Multiple will result in a decrease in profit or loss of ZWG90.8 million (2023 ZWG22.9 million). |
| Treasury bills | Discounted cashflow valuation technique (Level 2): The Group uses the discounted cashflow valuation technique by applying a risk discounted rate for comparable risk profiles and applying this on the contractual cash flows to determine the present value of the treasury bills. | The fair values of treasury bills are based on discounted cashflow valuation technique which make use of discount rate which takes into account the US Libor Rate of adjusted for country risk. Adjusted discount rate - (December 2024: Average rates of 0%- 9% (December 2023: Average rates of 0%-9%) A 2% increase in adjusted discount rate will result in the reported other comprehensive income increasing by ZWG51.3 million (2023: ZWG8.6 million) and the value of the treasury bills increasing by ZWG21.4 millior (2023: ZWG19.2 million) A 2% decrease in adjusted discount rate will result in the reported other |

comprehensive income decreasing by ZWG51.3 million (2023: ZWG8.6 million) and the value of the treasury bills decreasing by ZWG21.4 million (2023: ZWG19.2 million).

20.2.3.1 Liquidity risk

Definition

The Group considers two types of liquidity risk, funding liquidity risk and market liquidity risk. Funding liquidity risk is the risk that the Group is unable to meet its payment obligations as they fall due. These payment obligations could emanate from depositor withdrawals, the inability to roll over maturing debt or meet contractual commitments to lend. Market liquidity risk is the risk that the Group will be unable to sell assets, without incurring an unacceptable loss, in order to generate cash required to meet payment obligations under a stress liquidity event.

Through the robust Liquidity Risk Management Framework, the Group manages the funding and market liquidity risk to ensure that the Group's operations continue uninterrupted under normal and stressed conditions. The key objectives that underpin the Liquidity Risk Management Framework include maintaining financial market confidence at all times, protecting key stakeholder interests and meeting regulatory requirements.

This risk is identified through the analyses of contractual maturity mismatch between assets and liabilities and stress

Measurement methods

Liquidity risk is measured using the gap analysis techniques and the term structure of assets and liabilities.

The Group uses liquidity management tools such as the liquidity ratio, maturity gap analysis behavioural), daily cash flow summary & forecasting and stress testing to measure liquidity risk

Liquidity gap analysis as at 31 December 2024
The tables below set out the remaining contractual maturities of the Group's financial assets and financial liabilities.

20.2.3.2 Market risk

Market risk is the risk of losses in on- and off-balance sheet positions arising from movements in market prices. The Group is exposed to market risk through holding interest rate, foreign exchange rate and stock price sensitive positions. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising

Sensitivity analysis

A 10% change in the interest rate sensitivity assets would result in the reported profit/ loss and equity increasing or decreasing by ZWG 1,084 billion (December 2023: ZWG 0,287 billion).

A 10% change in the interest rate sensitive liabilities would result in the reported profit/ loss and equity increasing or decreasing by ZWG 1,687 billion (December 2023: ZWG 0,204 billion).

20.2.3.3 Foreign exchange risk

Foreign currency position

The carrying amount of the Group's foreign denominated monetary assets and liabilities as at 31 December 2024 were as follows:

| | 31 Dec 2024 ZWG | 31 Dec 2023 ZWG |
|--------------------|--------------------|--------------------|
| Botswana pula | 69 607 502 | 46 605 517 |
| British pound | 427 352 399 | 253 251 517 |
| Euro | 2 394 877 866 | 1 031 992 531 |
| South African rand | 3 588 058 416 | 1 332 321 246 |
| ZWG | 13 399 261 204 | - |
| USD | | 7 459 658 567 |
| Total assets | 19 879 157 387 | 10 123 829 378 |
| | | |
| Botswana pula | (220 985 433) | (42 652 692) |
| British pound | - | (229 210 886) |
| Euro | (1 851 669 706) | (1 003 828 514) |
| South African rand | - | (1 296 713 007) |
| ZWG | (36 453 895) | - |
| USD | - | (2 585 559 342) |
| Total liabilities | (2 109 109 034) | (5 157 964 441) |
| | | |
| Net position | 17 770 048 353 | 4 965 864 937 |
| | | .,, |

The Group's main exposure to foreign currency risk arises from the commitments for licence and support fees for information technology platforms that were sourced from foreign suppliers.

Sensitivity analysis

A 5% increase in exchange rates would result in the reported profit being reduced or increased by ZWG668 million (2023: ZWG96 million) and equity being reduced or increased by ZWG888 million (2023: ZWG129 million).

A 10% increase in exchange rates would result in the reported profit being reduced or increased by ZWG1.3 billion (2023: ZWG0.374 billion) and equity being reduced or increased by ZWG1.78 billion (2023: ZWG0.496 billion).

20.2.4 Credit risk

The table below shows the credit quality and the maximum exposure for credit risk based on the Group internal credit rating system and period-end stage classification.

| Overall Risk | Moderate | Acceptable | Moderate | Stable |

Interpretation of risk matrix

Level of Inherent Risk

Low - reflects a lower-than-average probability of an adverse impact on a banking institution's capital and earnings. Losses in a functional area with low inherent risk would have little negative impact on the banking institution's overall financial

Moderate - could reasonably be expected to result in a loss which could be absorbed by a banking institution in the normal course of business.

| Entity | 2024 | 2023 | 2022 |
|------------------------|------|------|------|
| ZB Bank Limited | BBB+ | BBB+ | BBB+ |
| ZB Building Society | B- | B- | B- |
| ZB Reinsurance Company | A- | A- | BBB |

The ratings for ZB Bank Limited and ZB Building Society expire in September 2025, whilst the rating for ZB Reinsurance expires in May 2025.

COMPLIANCE WITH REGULATIONS

Regulatory capital requirements - Banking operations

Commercial banks and building societies in Zimbabwe were required to maintain a minimum capital level of ZWG equivalent of USD30 million and USD20 million respectively, using the spot rate as at 31 December 2024. ZB Bank Limited met this requirement as at 31 December 2024, whilst ZB Building Society was not in compliance with this minimum regulatory capital requirement as at 31 December 2024.

As a result of non compliance of ZBBS with the minimum capital requirements, its the shareholders made a resolution in July 2024 to surrender the banking license to RBZ.

Subsequently, the Group applied for the surrender to RBZ, who have responded to the application, outlining specific conditions and guidelines that must be satisfied before the license is cancelled. The Group is currently working to fulfill these conditions, which include but not limited to smooth handling of deposits

in compliance with the Consumer Protection Framework No.1-2017/BSD.

The Group paid total penalties amounting to USD39 200 in respect of late publication of 31 December 2023 financial results and other non compliance related matters

In terms of paragraph 3 of Statutory Instrument 206 of 2021, Amendment Regulations of 2021 (Number 22), paragraph 11B (1) was inserted to the principal regulations of the Insurance Act (Chapter 24:07) with the effect of setting the minimum prescribed assets ratios for insurers at the rate of 15% of the market value of total adjusted assets in the case life assurance businesses and 10% of the market value of total adjusted assets in the case of short-term re-insurance

ZB Life Assurance Limited did not comply with these ratios throughout 2024, closing the year with ratio at 9.35% (2023: 6.04%). As further required by paragraph 11B sub-section 4, ZB Life Assurance has collaborated with the Insurance and Pensions Commissions (IPEC) on the non-compliance as required by the Regulations, and provided a roadmap to remedy the non-compliance which is being tracked on a monthly basis. Compliance has been affected by the shortage of qualifying assets on the market. Furthermore, the ratio have been impacted on by an inflationary growth in the value of assets. The non-compliance persisted up to the date of release of these financial statements. No penalties have been levied on ZB Life Assurance Limited for the non-compliance.

ZB Reinsurance complied with this requirement as at 31 December 2024 with a ratio of 11% (2023: 12%).

21.3 Other compliance issues

The directors are not aware of any other material cases of non-compliance with regulations governing the operations of

SUBSEQUENT EVENTS

Migration of OUPA Microfinance to the Banking Cluster

With effect from 1 January 2025, the Qupa Microfinance business was moved from the Investment cluster to the Banking cluster due to the similarities of its operations with the rest of the banking operations. This move does not result in any changes in the operations of the Qupa Microfinance Company and also has no impact on the Group Financial Statements for the year ended 31 December 2024.

Reopening of ZB Asset Management

The Group is resuscitating its Asset Management arm through the planned reopening of ZB Asset Management under the Investments Cluster which plays a key role in supporting the Group's Wealth management strategy. This will bring in scope for the Group to offer pooled investment products to the market and in the process enhance its profile as a one stop shop for financial products. Resultantly, the Investment Properties under ZB Financial Holdings will be transferred back to ZB Asset Management Company. This has no impact on the financial statements for the year ended 31 December

Closure of ZB Capital (Private) Limited

Following the resolution, the operations of ZB Capital were ceased effective 1 January 2025. ZB Capital's corporate finance operations were transferred to ZB Bank Limited and its assets to ZBFH. This has no impact on the financial statements for the year ended 31 December 2024.

GOING CONCERN 23.

The Board undertakes regular assessment of whether the Company and its subsidiaries is a going concern in the light of current economic conditions and all available information about future risks and uncertainties

The Monetary Policy Committee of the Reserve Bank of Zimbabwe revised minimum capital requirements for banking institutions which became effective from 31 December 2021. The revised limit for Tier 1 Banks is the ZWG equivalent of USD30m and for Building Societies is the ZWG equivalent of USD20m reckoned with reference to the exchange rate ruling at that time.

In order to address the capital shortfall at ZBBS, the Group resolved to surrender the Building Society's banking licence. The Group have already applied for the surrendering of banking license of ZBBS to the RBZ, who have responded with conditions that should be satisfied before the cancellation of the license and the Group is addressing the conditions raised by RBZ as guided by Consumer Protection Framework No. 1 -2017/BSD, which sets out the rights of customers and obligations of banking institutions. The Group has assessed the conditions specified by RBZ and concluded that it is highly probable it will comply with these conditions before 31 December 2025.

The Group will ensure that it continues to support the ZBBS to meet customer demands in the normal course of business until the surrender of the license process is finalised.

The Board has reviewed budgets for 2025 and the cash flow projections for the Group. The Board does not have any reason to conclude that the Group will not be a going concern for the foreseeable future.

Consequently, the financial statements for the year ended 31 December 2024 have been prepared on going concern

| 2. | TREASURY BILLS | 2 /30 622 883 | 902 853 610 |
| 2.1 | Reported in the statements of financial position The Reserve Bank of Zimbabwe (RBZ) has issued various forms of treasury bills which the Bank has participated in. The Bank has three categories of treasury bills classified as follows: a) as "at "Fair value through profit or loss (FVTPL)"; b) as "at "Fair value through other comprehensive income (FVTOCI)"; and c) as "at amortised cost (AMCO)". | | |
| | Treasury bills include: Assets classified as '' at FVTPL'' Treasury bills acquired from the primary market | 69 750 303 | 15 304 723 |
| | Assets classified as at "FVTOCI": Medium term treasury bills" acquired from the secondary market ² Assets classified as " at AMCO": | 1 005 066 105 | 309 978 475 |
| | Treasury bills issued as substitution for debt instruments ³ Capitalization treasury bills ⁴ | | 46 046 41 509 |
| | Allowance for ECL | 1 074 816 408 (205 453 411) 869 362 997 | 325 370 753 - 325 370 753 |
| | Maturity within 1 year Maturing after 1 year | 667 832 278 201 530 719 | 15 338 555 310 032 198 |
| | | 869 362 997 | 325 370 753 |

The Bank invested in treasury bills issued by the RBZ over an average period of 106 days (December 2023: 61 days) which were at an average rate of 3.75% (December 2023: 3.75%).
 The Bank purchased treasury bills from the secondary market. These treasury bills have an average coupon rate of 2.5% (December 2023: 2.5%) with an average maturity period of 1 year 6 months (December 2023: 2 years).
 The Bank received treasury bills as substitution for debt instruments from the Zimbabwe Asset Management Company (ZAMCO). The treasury bills coupon rate of 5% and an average maturity period of 6 years. The treasury bills were settled in current year.
 Capitalization treasury bills (CTBs) with a face value of ZWG8,004 were acquired on 26 May 2015 from the government of Zimbabwe by the holding company ZB Financial Holdings (ZBFH). The CTBs were settled in the current year.

Treasury bills amounting to ZWG1.34 billion (2023: ZWG401 million) were used as security for the Bank to access fixed deposits.

2.2 Determination of fair value of treasury bills

The fair value of treasury bills was determined using level 2 and level 3 inputs for treasury bills which are classified as FVPL and FVTOCI respectively. The use of level 2 and level 3 inputs is due to lack of active market for treasury bills which are classified as "FVTPL" and FVTOCI. The Bank used the discounted cash flow valuation technique by applying a risk discounted rate for comparable risk profiles on the contractual cash flows in order to determine the present value of the treasury bills.

Treasury bills purchased from the secondary market value were fair valued using TBs average yield market rate of 24%.

| | | |

For the secured non-performing loans, security exists in the form of liens registered over funded accounts, bonds registered over landed property and guarantees in various forms. The Bank discounts the value of the security at hand using internal thresholds for prudential purposes. Generally no security value is placed on ordinary guarantees. The internally discounted value of security held in respect of the non-performing book amounted to ZWG119.7 million as at 31 December 2024 (2023 ZWG26.5 million).

Independent Auditor's Report

To the Shareholders of ZB Financial Holdings Limited

Report on the Audit of the Consolidated and Separate Financial Statements

Opinion

We have audited the consolidated and separate financial statements of ZB Financial Holdings Limited and its subsidiaries ('the Group and company) set out on pages 12 to 120 which comprise of the consolidated and separate statements of financial position as at 31 December 2024, and the consolidated and separate statements of profit or loss and other comprehensive income, the consolidated and separate statements of changes in equity and the consolidated and separate statements of cash flows for the year then ended, and notes to the consolidated and separate financial statements, including material accounting policy information.

In our opinion, except for the effects of the matters described in the 'Basis for Qualified Opinion' section of our report, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of the group and company as at 31 December 2024, and their consolidated and separate financial performance and consolidated and separate cash flows for the year then ended, in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and the requirements of the Companies and Other Business Entities Act (Chapter 24:31), the Banking Act (Chapter 24:20), the Building Society Act (Chapter 24:02), the Insurance Act (Chapter 24:07), the Securities and Exchange Act (Chapter 24:25) and the Microfinance Act (Chapter 24:29).

Basis for Qualified Opinion

Non-compliance with IAS 21 "The Effects of Changes in Foreign Exchange Rates"

As explained in note 3.1.1.3 to the consolidated and separate financial statements, the functional currency of the Group and its subsidiaries is the United States Dollar (USD). The consolidated and separate financial statements are presented in Zimbabwe Gold currency, ZWG.

Mashonaland Holdings Limited, "Mash", a subsidiary of the Group, changed its functional currency from Zimbabwean Dollars (ZWL) to USD effective 1 January 2023. All the other subsidiaries within the Group changed their functional currencies from ZWL to USD effective 1 January 2024. International Accounting Standards (IAS) 21, Effects of Changes in Foreign Exchange Rates requires the change in functional currency to be applied prospectively. Further, the procedures set out in IAS 21 would have required all ZWL inflation adjusted balances as of 31 December 2022 (for Mashonaland Holdings) and as of 31 December 2023 (for all other subsidiaries) to be converted to USD at the spot rate ruling on that date.

The directors followed an IAS 21 compliant approach for all financial statement elements with the exception of the following:

- **Group**: Investment properties Mashonaland Holdings The Directors adopted the USD valuations of the assets as at the date of change in functional currency on 1 January 2023, instead of translating the ZWL inflation adjusted numbers to USD numbers as at that date.
- **Group**: Investment properties and Property and equipment All other subsidiaries except for Mashonaland Holdings The Directors restated the fair values of the investment properties and property and equipment as of 31 December 2023 taking into account the USD valuations of the assets as at that date, instead of translating the ZWL inflation adjusted numbers as at 31 December 2023 to USD.
- **Company:** Investments in subsidiaries The Directors restated the 2023 fair values by recomputing the net asset value of the subsidiaries after having recorded the above adjustments

to Investment properties, Property and equipment, and retained earnings. This contradicts the IAS 21 requirements wherein the reported fair value as of 31 December 2023 should have been translated to USD at the spot exchange rate at that date.

As a result, the following consolidated financial statement elements are impacted:

Consolidated Statement of Profit or Loss and other comprehensive income

- Fair value adjustments are overstated by ZWG 230 870 237: (2023: understated by ZWG 230 870 237)
- Gains on property and equipment revaluation are overstated by ZWG 264 296 153 (2023: understated by ZWG 264 296 153)
- Deferred tax movement included under Income tax expense is understated by ZWG56 531 518 (2023: overstated by ZWG56 531 518)
- Depreciation included in Operating expenses is understated by ZWG 21 333 476

Separate statement of profit or loss and other comprehensive income

• Fair value adjustments is overstated by ZWG285 042 328 (2023: understated 285 042 328)

Further, corresponding amounts for Investments in subsidiaries, Investment Properties, Property and Equipment, Deferred tax, Retained Income, Revaluation Reserve and Non-controlling interests in the consolidated statement of financial position are impacted. Corresponding Effects of translation to presentation currency reconciling items in the disclosures on these line items are also impacted. Our audit report is therefore modified due to the possible effects of this matter on the comparability of the current period's figures and the corresponding figures.

The misstatements are material however not pervasive to the consolidated and separate financial statements.

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the consolidated and separate financial statements section of our report. We are independent of the group and company in accordance with the International Code of Ethics for Professional Accountants (including International independence standards) (IESBA Code) and other requirements applicable to performing audit of financial statements in Zimbabwe. We have fulfilled our other ethical requirements in accordance with those requirements and the IESBA Code. We believe that the audit evidence we obtained is sufficient and appropriate to provide a basis for our qualified opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. In addition to the matter described in the Basis for qualified opinion section, we have determined the matters described below to be the key audit matters to be communicated in our report. These matters were addressed in the context of our audit of the financial statements, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For the matters below, our description of how our audit addressed the matters is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key Audit Matter

How our audit addressed the matter

Valuation of expected credit losses on financial assets

As disclosed in notes 6 and 7 to the financial statements, the carrying amount of treasury bills and loans and advances amounts to ZWG 1,087,422,572 and ZWG 4,151,584,123 respectively. These financial assets constitute a substantial proportion of the total assets of the Bank. The Expected Credit Losses (ECL) determined for treasury bills and loans and advances amount to ZWG208,622,743 and ZWG162,905,078 respectively. as disclosed on note 6.1 and 7.1 respectively.

The bank provides for impairment on treasury bills and loans and advances based on the expected credit losses model (ECL) in terms of IFRS 9 - Financial Instruments. Management developed model methodologies and determined the inputs that should be implemented in the models to estimate the ECL.

The determination of ECL requires significant judgements such as:

- The estimation of the key components of the expected credit loss ('ECL') provisions, that is, the probability of default (PD), loss given default (LGD) and exposure at default (EAD).
- The allocation of assets to stage 1, 2 or 3 on a timely basis using criteria in accordance with IFRS 9. This includes allocation of appropriate credit grade ratings to customers.
- Determination of staging migration criteria that reflects significant increase in credit risk (SICR).
- Determination of appropriate forward-looking information (FLI) to incorporate in ECL model considering the current economic environment.
- Estimation of the loss rates for non-performing loans.

The significant judgements above, which present areas of estimation uncertainty and complexities in determining expected credit losses resulted in the audit team spending more time in performing audit procedures on the balance. We have thus designated valuation of expected credit losses on financial assets as a key audit matter.

Our procedures to address the matter included the following:

- We reviewed documents and enquired of management to understand management's process for credit origination, monitoring, and appraisal.
- We identified relevant controls for the ECL risks and assessed their design and implementation.
- We conducted a general assessment of the ECL provision levels by stage to evaluate their reasonableness, taking into account the overall credit quality of the banks' portfolios and risk profile.
- We evaluated the Bank's SICR methodology and the calibrations of its ECL models. For a sample of exposures, we examined the loan staging process, confirming the classification into stages 1, 2, and 3 in accordance with IFRS 9 requirements by reviewing the last payment date. For treasury bills, we examined both the coupon payments and the settlement pattern of the principal amounts.
- We assessed and evaluated whether the disclosure effectively communicates the key judgments and assumptions made by management in the present economic landscape.

For model-based procedures; with the assistance of our specialists, we performed the following:

 We evaluated the governance processes established by the Bank to review and approve the economic scenarios and the models used in the determination of the expected credit losses.

In relation to the expected credit loss computation and the models, we performed the following:

- Methodology Review (MR) We evaluated the conceptual soundness of the ECL model methodology to ensure that the adopted approaches align with best practices and IFRS 9 requirements.
- Validation Testing (VT) We performed independent validation of the developed models by performing various statistical tests on the ECL parameters in order to test the performance of the models (PD, LGD, & EAD). We also performed model backtesting tests on the ECL inputs.
- Model Implementation Testing (MIT) We tested and validated that the model inputs developed and documented in the model methodology are the ones

Management's approach and key assumptions are included on accounting policy note 2.2.2.5 and 3.4.1.5 of the financial statements.

- implemented in the ECL code / system used to estimate the ECL.
- Model Reperfomance Testing (MRT)- We independently recalculated ECL and performed impact assessments and compared with management output.
- We evaluated the forward-looking information and assessed the macroeconomic scenario forecasts generated for reasonableness.

Valuation of Insurance contracts

As of December 31, 2024, the Group, through ZB Life Assurance and ZB Reinsurance Limited, holds insurance contract liabilities totalling ZWG268, 691,070. The valuation of these liabilities relies on significant judgments and assumptions which include the following:

- Determination of the present value of future cash flows (PVFCF).
- Determination of the Contractual Service Margin (CSM).
- Estimation of the risk adjustment.

Expert judgment, integrated within complex actuarial models, is essential, drawing from subjective assumptions regarding forthcoming events, including mortality rates, persistency, and economic conditions.

Given the complexity and subjective nature of the measurement of the insurance contract liabilities, we have identified the area as a key audit matter.

Management's approach and key assumptions are included on accounting policy note 3.20 of the consolidated financial statements.

Our procedures regarding insurance contract liabilities included, among others:

- We obtained an understanding of and evaluated the design and implementation of management's controls over the significant estimates and assumptions used in determining the insurance contracts, including model data inputs.
- With the support of our actuarial specialists:
 - we evaluated the key assumptions used in the determination of PVFCF, CSM and risk adjustment. We assessed their reasonableness considering experience studies, our knowledge of the entities, the products offered, and available market and macroeconomic data.
- We tested the methodology and logic of models used through independent recalculations on a sample of models and compared the calculation logic to industry-comparable models.
- We assessed the appropriateness of management's data and assumptions applied in determining the insurance contract liabilities, including the reasonableness of coverage units.
- We reviewed the analysis of actual experience over expected results for any unusual or unexpected results.
- We assessed whether the associated disclosures comply with IFRS 17 - Insurance contracts.

Other Information

The Directors are responsible for the Other information. The other information consists of the information included in ZB Financial Holdings Annual Report other than the financial statements and our auditor's report

thereon. We obtained the Chairman's statement, the group Executive Report, the Report of the Directors and the Directors' Responsibility Statement prior to the date of our auditor's report. It also includes information included in the Annual Report expected to be received after the date of our auditor's report. The other information does not include the consolidated and separate financial statements and our audit report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. As described in the Basis for qualified opinion section above, we have concluded that the other information is materially misstated for the same reasons with respect to non-compliance with IAS 21 "Effects of changes in foreign exchange rates".

Responsibilities of the Directors for the Consolidated and Separate Financial Statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements, in accordance IFRS Accounting Standards as issued by the International Accounting Standards Board and the requirements of the Companies and Other Business Entities Act (Chapter 24:31), the Banking Act (Chapter 24:20), the Building Society Act (Chapter 24:02), the Insurance Act (Chapter 24:07), the Securities and Exchange Act (Chapter 24:25) and the Microfinance Act (Chapter 24:29), and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the group and company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group and company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group and company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or

conditions that may cast significant doubt on the group and company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group and/or the company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the consolidated and separate financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is Mrs. Elina Bvurere (PAAB Practising Number 0462).
